

MEET BHATT

mbbhatt@andrew.cmu.edu — meetbhatt.com — github.com/Meet2304 — (380) 226-4073 — linkedin.com/in/meet-bhatt2304

EDUCATION

Carnegie Mellon University – Pittsburgh, PA December 2027
Master of Science in Artificial Intelligence Engineering and Technology Innovation Management

Pandit Deendayal Energy University (PDEU) – Gujarat, India June 2026
Bachelor of Technology in Computer Engineering, Minor in Internet of Things GPA: 9.55/10

SKILLS

Artificial Intelligence & Machine Learning: Reinforcement learning from human feedback (RLHF), supervised fine-tuning, language-model agents, model visualization tools, convolutional neural networks for image processing, time-series forecasting, Random Forest, XGBoost

Cloud & Backend: Google Cloud, Kubernetes, Supabase, Firebase, LiveKit, GitHub Actions

Full-Stack Development: TypeScript, Next.js, React, Tailwind CSS, Python

Embedded Systems: C, Teensy 4.0 and ESP32-S3 microcontrollers, circuit board design, sensor integration and communication

PROFESSIONAL EXPERIENCE

Health and Human Performance Lab, Carnegie Mellon University September 2026 – December 2026
Research Assistant — Advisors: Prof. Kirk Warren Brown and Prof. J. David Creswell

- Applying interpretable, cross-validated models to longitudinal data to predict mindfulness treatment response.
- Extending pre/post models to daily-life data to identify participant and practice patterns linked to benefit.

Corporate Startup Lab - Bosch Mobility August 2026 – December 2026
• Conducting market research, customer discovery, and strategic-fit analysis in a 6-person team to expand Bosch Mobility's low-voltage actuator portfolio.

Blink Analytics August 2024 – June 2026
RLHF Contributor → RLHF Team Lead → Lead Product Development Intern

- Led development of Serin, an interview and hiring platform powered by artificial intelligence; designed its real-time communication, language-model, and cloud infrastructure and candidate evaluation framework.
- Directed a summer intern team on model fine-tuning using human feedback and internal performance-tracking systems, driving a 222% increase in project revenue in two months.
- Advanced from annotating data and evaluating models to leading human-feedback training teams and product development.

Astar Technologies December 2023 – January 2024
Lead Business and Data Analysis Intern

- Identified top-selling sweets by region and season to guide production and marketing decisions.
- Cleaned and standardized raw sales data, then modeled regional and seasonal demand using time-series forecasting and machine learning models, including Random Forest and XGBoost.

RESEARCH EXPERIENCE

Project Phoenix – Explainable Cervical Cancer Classification July 2025 – May 2026
phoenix.meetbhatt.com — Manuscript in preparation

- Enhanced contrast and reduced noise in SipakMed and Herlev cervical cell images while preserving diagnostic features.
- Used convolutional neural networks and visualization tools to identify image regions driving predictions, improving model interpretability.

Malicious Prompt Classifier – Markov Chain Detection System July 2025 – October 2025
Published in Procedia Computer Science (2026)

- Developed a probabilistic detector for malicious language-model prompts by analyzing transitions between text sequences, with an explanation module highlighting high-risk patterns.
- Achieved 90.79% accuracy, 98.84% precision, 82.54% recall, and an 89.96% F1 score on a malicious-prompt benchmark.

PROJECTS

Linea – Desktop Music Lyrics Overlay — linea.meetbhatt.com April 2026 – Present
• Built an Electron app for time-synced lyrics with a transparent, always-on-top, click-through window, playback integration, and local-only storage.

Project Icarus – Custom Drone Development July 2024 – June 2026
• Built and flew a custom drone using a Teensy 4.0 flight controller, custom circuit board, integrated sensors, and C-based flight control for stable orientation.

Project Talaria – Wearable Cardiovascular & Gait Monitor July 2025 – November 2025
talaria.meetbhatt.com
• Built a wearable system streaming real-time heart rate, blood oxygen saturation, and motion-based gait data to a cloud pipeline for continuous monitoring.
• Forecast 15 physiological and motion features 50 steps ahead with a recurrent neural network ($R^2 = 0.97$, mean absolute error 0.103) trained on 50,000+ sequences.

LEADERSHIP

Mind Ripple — The Quizzing Club of PDEU November 2022 – April 2026
Subcommittee Member → Head of Graphic Design → President → Advisor
• Led a 30-member team and grew the flagship event, Matrix Breakout — The Escape Room, to 300+ participants, increasing earnings 10% year over year.

Interact Club of Baroda Sayajinagari — Charter President, Rotary-affiliated July 2021 – June 2022
• Founded and led 32 teenagers under 19 in service projects with nonprofits, including Pratibha Foundation.

HONORS & SCHOLARSHIPS

J N Tata Scholar – Recipient of the J N Tata Scholarship.
